Testing Spring

Beginner to Guru

TDD 4 - Privacy

Privacy

- Currently the 'amount' property is public

- Being public other classes can see and modify the amount property

- OO Best Practice is to only expose what you need to

- With the implementation of equals() current functionality does not require access to amount

TDD To-Do List

- $5 + 10 CHF = $10 (with rate of 2:1)

- ~~$5 * 2 = $10~~

- ~~Make "amount" private~~

- ~~Dollar side effects?~~

- Money Rounding?

- ~~equals()~~

- hashCode()

- Equal Null

- Equal Object
